IT'S HILLSDALE—

It is a lot of fun when you can select your plants from our Rose garden.

Undoubtedly a great boon to the Rose buyer is the potted plant, which enables us to offer our Roses already growing and blooming. This new way of selling them eliminates all danger of the plants being retarded in your garden, and insures the buyer of exactly the variety desired.

These plants are growing in pots filled with a specially prepared soil, properly fertilized to insure rapid and permanent growth and bloom. Hillsdale Roses can be planted in your garden at any time during the growing season without showing even the slightest wilt of foliage, buds or blooms.

• Please Note •

All prices quoted are for plants at our Nursery. An extra charge for the labor will be made when we do the planting.

HILLSDALE Annual Rose Festival

This year on June 9 and 10, when the Roses are in full bloom, our large display gardens will be formally open to the public at our Annual Rose Festival. Our new Rose garden with over 3000 Hybrid Teas, Climbers and Floribunda Roses now blooming in their second and third year, will be a beautiful sight to behold. We have added all the newer and best introductions and now have the finest and largest Rose garden in this section of the country. All of the All-America Rose Selections of the past several years will be on display. Last year over 50,000 people visited our gardens during Rose Festival week. We have enlarged our parking facilities close to the garden and therefore will be able to accommodate a larger attendance.

When You Think of Fine Roses

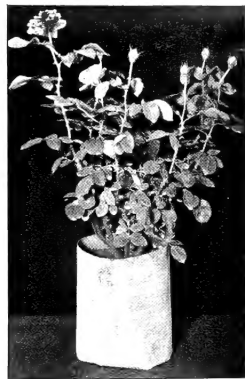

Roses from Hillsdale are always better. They are carefully selected, No. 1 field-grown plants—the best on the horticultural market. Each variety has been tested in our own gardens. This assures you of receiving hardy, vigorous plants, which will have beautiful blooms in abundance from varieties well adapted to this section of the Middle West. These Roses will give you quantities of lovely bloom from June until frost the first year.

Directions for Re-planting Potted Roses

The re-planting of Hillsdale potted Roses is very simple indeed. The pots are slit and carefully peeled off from the soil. The ball of earth is then set in the bed so that it comes about one-half inch lower than the finished level of the beds. Always press the soil firmly around the roots of any kind of plant. This is done to force the air space out of the soil around the roots. After this, watering to soak the soil thoroughly is all that is necessary.

OUT-OF-TOWN ORDERS that must be crated and sent by express are accepted only when order is for 6 plants or more. An extra charge of 25c per plant will be made for crating.

Dormant plants will be available until May 1.
